G. In order to carry out the provisions of § 58.1-816.B, Code of Virginia, there is hereby appropriated a sum sufficient amount of general fund revenues estimated at \$11,000,000 in the first year to apportioned and distributed quarterly to each county or city except for those counties or cities located in Planning District 8, by the Comptroller by manner and ratios prescribed in Item 273 subsection F."

By limiting incurred costs to July 1, 2020 forward, significant unreimbursed COVID-costs from the inception of the crises for both assisted living and nursing facilities are being unnecessarily excluded from potential reimbursement. By essentially prohibiting the legitimate use of

D.1. Subject to review and approval by the Secretary of Natural Resources, the Director of the Department of Game and Inland Fisheries may issue to the Department of Transportation an interim permit to relocate the nest and eggs of any state listed threatened bird species from critical areas of the Hampton Roads Bridge Tunnel Expansion Project's South Island associated with the ingress and egress to the island; the delivery, assembly, and immediate operations of the tunnel boring machine; or other project critical locations as mutually agreed to by the Commissioner of Highways and the Director, which, if not relocated, would effectively require all substantial construction activities to cease.

2. Prior to the issuance of an interim permit as described in Section 1, (i) the Director must determine that the Department of Transportation and its design-build contractor have taken all reasonable steps to prevent birds from nesting on the South Island, in accordance with the Colonial Nesting Bird Management Plan dated March 27, 2020, (ii) the Commissioner of Highways must determine that substantial construction activities will have to cease if the nest and eggs are not relocated, and (iii) the Director shall require as a condition of the interim permit that the nest and any eggs will be relocated under the supervision of the Department of Game and Inland Fisheries to a location acceptable to the Director that is as close as possible to the original nesting location while allowing construction activities to continue.

3. Within 30 days of the adoption by the Board of Game and Inland Fisheries of any regulation governing the take of migratory birds or threatened and endangered species, the Department of Transportation shall apply for a permit covering such take for the Hampton Roads Bridge-Tunnel expansion project.

~~4. Any agency that exercises the authority granted in paragraph D.1, or that issues any permit that has an adverse impact on fish and wildlife or their habitat, may require compensatory mitigation for such adverse impact as a condition of issuing the permit.~~

**Explanation:**

(This amendment authorizes the use of federal COVID-19 relief funds to provide \$882,500 from the Coronavirus Aid, Relief and Economic Security Act (CARES) Act to enable the Virginia Mental Health Access Program (VMAP) to respond to the children's mental health crisis being experienced as a result of the COVID-19 pandemic. Since the start of the pandemic, primary care providers are seeing an increase in the number of children with mental health issues. The sudden and traumatic experiences of changes to daily routines, social isolation, increased family stress, and the challenges of virtual education have resulted in an escalating number of children with mental health disorders. In July, the Virginia Chapter of the American Academy of Pediatrics conducted a survey of primary care providers and found that 88% of respondents reported an increase in mental and behavioral health issues in children since the onset of COVID. VMAP is specifically designed for children and provides them with mental health services by expanding the existing workforce. It gives children's health care providers access to child psychiatrists, psychologists, social workers, and care navigation. This funding will allow VMAP to expand components of the program statewide, so that more children have access to these services.)

to adjust minimum salary levels for family service workers and other positions in local departments of social services and address compression issues. Turnover rates for a Family Services Worker Specialist is 42% with retention efforts an even greater issue in small, rural agencies. The impact of high turnover rates is found in Virginia's low rate of permanency for children and the number of placements children experience. Fifteen percent of foster care caseworkers in Virginia carry caseloads of more than 15 children at a time, higher than the widely accepted caseload standard of 12 to 15 children per caseworker. These caseworkers collectively manage one-third of all foster care cases. Restoring the salary increase will also increase minimum salaries for for benefit program services positions, self sufficiency services positions and administration positions that are currently below the new minimum threshold. Funding will be matched by local governments at a match rate of 15.5% beginning July 1, 2021. "c. Notwithstanding any other provision of law, the State Corporation Commission (the Commission) shall direct each Phase II Utility, as that term is defined in § 56-585.1 of the Code of Virginia, to provide emergency customer bill credits in the amount of \$366.8 million, which amount corresponds to the aggregate amount of overearnings the Commission found, for calendar years 2017 through 2019, to be above 70 basis points (0.7%) above the utility's authorized rate of return on common equity in its August 18, 2020, Status Report on the Implementation of the Virginia Electric Utility Regulation Act. The Commission shall administer such emergency credits as follows: (i) 70 percent of such amounts shall be credited to customers' bills as a one-time bill credit, (ii) 30 percent shall offset, on a dollar-for-dollar

*Request to Amend House Bill 5005, as Introduced*

basis, any of the utility's outstanding aged accounts receivable balances as of August 31, 2020, and (iii) the Commission shall establish an account for any amounts left over from the 30 percent, which the Department of Housing and Community Development shall administer to provide future bill relief to residential customers who are eligible for state or federal unemployment or disability benefits or any utility-sponsored, federally-funded, or state-sponsored income-based or age qualifying energy assistance program, in a manner determined by the Commission. The Commission may adopt regulations and eligibility criteria that are consistent with the purpose of this act and necessary to accomplish such emergency credits and relief. The Commission shall ensure that such emergency credits are made effective as soon as practicable after the effective date of this act.

Nothing in this act shall prohibit the Commission from ordering additional bill credits if the Commission finds in the utility's next triennial review that such bill credits are appropriate. To ensure that customers receive the full amount of appropriate bill credits in the utility's next triennial review, in any triennial review commencing in 2021 pursuant to § 56-585.1, the following shall apply: (i) the Commission shall direct that 100 percent of any overearnings that are more than 70 basis points above the utility's authorized rate of return on common equity not otherwise administered as emergency credits authorized by this act shall be credited to customers' bills, which the Commission shall amortize, in its sole discretion, over a period of 6 to 12 months; (ii) the provisions of subdivision 8 d of § 56-585.1 shall not apply; (iii), the Commission shall determine the amortization period for the recovery of any appropriate costs of early retirement for automated meter reading electric distribution service meters, costs associated with projects necessary to comply with state or federal environmental laws, regulations, or judicial or administrative orders relating to coal combustion by-product management that the utility does not petition to recover through a rate adjustment clause pursuant to subdivision 5 e of § 56-585.1, costs associated with severe weather events, and costs associated with natural disasters, and the Commission shall allow for the recovery of any carrying costs that the Commission deems appropriate; and (iv) there shall be no limit on the Commission's authority to order appropriate rate reductions except that the resulting rates must provide the utility with the opportunity to fully recover its costs of providing its services and to earn not less than a fair combined rate of return on its generation and distribution services.

Any emergency bill credits ordered pursuant to this act shall not be considered as revenue reductions in any future earnings tests. Any bill credits ordered in connection with the utility's 2021 triennial review shall be calculated net of any emergency bill credits ordered pursuant to this act. The Commission shall not authorize increases to the utility's rates for generation and distribution services prior to 2023 unless the Commission determines that such rate increases are necessary to allow the utility to recover its costs of service, including a fair rate of return. In the utility's next triennial review, the Commission may take any actions it deems necessary and appropriate if the emergency bill credits ordered pursuant to an emergency investigation exceed the bill credits due to customers in the normal course of the utility's triennial review."

It also provides that in any triennial earnings review conducted for a utility in 2021 the Commission shall order bill credits for any earnings above 70 basis points above the utility's authorized rate of return and that the Commission shall have the discretion to amortize certain categories of costs incurred by utilities.)
