# VIRGINIA STATE BUDGET

---

2014 Special Session I

## Budget Bill - HB5001 (Introduced)

Bill Order » Office of Technology » Item 427

Virginia Information Technologies Agency

Item 427 (Not set out)	First Year - FY2013	Second Year - FY2014
<b>Information Technology Planning and Quality Control (82800)</b>	<b>\$5,746,285</b>	<b>\$3,368,279</b>
Information Technology Investment Management (Itim) Oversight Services (82801)	\$1,387,718	\$1,307,512
Enterprise Development Services (82803)	\$4,358,567	\$2,060,767
Fund Sources:		
General	\$2,016,983	\$1,936,777
Dedicated Special Revenue	\$1,153,400	\$1,355,600
Federal Trust	\$2,575,902	\$75,902

---

Authority: Title 2.2, Chapter 20.1, Code of Virginia.

A.1. Notwithstanding any other provision of law except the limitations imposed by § 2.2-518, § 2.2-4803 and § 2.2-4806, Code of Virginia, Executive Department agencies and institutions may enter into management agreements with CGI Technologies & Solutions, Inc. (CGI) for debt collection and cost recovery services pursuant to Statements of Work 6 and 7 of the Enterprise Applications Master Services Agreement between the Commonwealth of Virginia and CGI. Executive Department agencies and institutions may also enter into additional Statements of Work with CGI pursuant to § 2.2.4 of the Enterprise Applications Master Services Agreement for services related to such Agreement, which may include, but not be limited to, services supporting projects in the five towers of enterprise-level endeavors (financial management, human resource management, supply chain management, administrative management, and applications development and management). Work on enhanced collections and recoveries or any additional Statements of Work pursuant to § 2.2.4 of the Enterprise Applications Master Services Agreement shall not proceed if they commit the Commonwealth to expanding or significantly altering any existing federal or state program without the review and approval of the Governor and prior consultation with the Chairmen of the House Appropriations and Senate Finance Committees.

2. Moneys resulting from enhanced collections and cost recoveries pursuant to this Item shall be held in the Virginia Technology Infrastructure Fund as established by § 2.2-2023, Code of Virginia.

3. The Auditor of Public Accounts shall provide the Governor and the Chairmen of the House Appropriations and Senate Finance Committees no later than December 1, 2013, a report of the result of a financial and operational audit of CGI and its subcontractors, as provided in parts 15.2 and 15.3 of the Enterprise Applications Master Services Agreement. The audit shall review all management agreements between CGI and Executive Department agencies and institutions pursuant to Statements of Work 6 and 7 and include a review of CGI and its subcontractors' performance with regard to measured service levels.

B.1. As established in § 3-2.03 of this act, working capital advances totaling up to \$90,000,000 will provide for the development of enterprise applications for the Commonwealth, including the development of the performance budgeting and financial management systems. These working capital advances will be repaid from anticipated

revenues from enhanced collections, cost recoveries, inter-agency collaborative projects and other initiatives to be collected pursuant to this item and will be deposited into the Virginia Technology Infrastructure Fund. No funds derived from these working capital advances shall be expended without the prior budget approval of the Secretaries of Technology and Finance. The State Comptroller shall notify the Governor and the Chairmen of the House Appropriations and Senate Finance Committees prior to any approved expenditure.

2. Funds received from the working capital advance will be used only for enterprise resource planning and development costs. No funds received from this working capital advance shall be used as payment toward operating costs of this or any other program.

3. At the end of each fiscal year, the Governor is authorized to apply up to \$2,000,000 from the unappropriated general fund balance in this act to pay down this working capital advance in the event other repayment sources in this act are not available or are insufficient to maintain a reasonable schedule for the payback of the working capital advance.

C.1. In order to minimize the cost of information systems development, the Secretary of Technology shall work with all Cabinet Secretaries and their agencies to develop Commonwealth data standards for citizen-centric data, personnel, recipient information, and other common sources of information gathered by the Commonwealth and in use by systems set out within this item. Not later than November 1, 2012, the Secretary of Technology shall communicate an initial plan that will provide at least an estimated timetable, cost and description of the anticipated scope of the effort to the Governor and the Chairmen of the House Committee on Appropriations and the Senate Committee on Finance. A final plan, with a specified timetable and costs required to gather, approve and publish these standards, shall be communicated to the Governor and the Chairmen of the House Committee on Appropriations and the Senate Committee on Finance by July 1, 2013. In developing the plan, the Secretary of Technology shall use best practices, federal requirements, and existing data standards.

2. Where active projects in this item, have implemented standardized data, the Secretary of Technology shall work with all Cabinet Secretaries and their agencies to determine if these standards should be adopted as Commonwealth data standards for use in active or future major IT projects or investments. Where active projects in this item do not conform to the Commonwealth's data standard, the Secretary of Technology shall include in the interim a plan for how the Secretary of Technology will identify data standards that should be adopted as Commonwealth data standards and the estimated cost of ensuring that each active IT project in the item complies with the Commonwealth data standard.

D.1. Notwithstanding the provisions of §§ [2.2-1509](#), [2.2-2007](#) and [2.2-2017](#), Code of Virginia, the scope of formal reporting on major information technology projects in the Recommended Technology Investment Projects (RTIP) report is reduced beginning in the second year. The efforts involved in researching, analyzing, reviewing, and preparing the report will be streamlined and project ranking will be discontinued. Project analysis will be targeted as determined by the Chief Information Officer (CIO) and the Secretary of Technology. Information on major information technology investments will continue to be provided General Assembly members and staff. Specifically, the following tasks will not be required, though the task may be performed in a more streamlined fashion: (i) The annual report to the Governor, the Secretary, and the Joint Commission on Technology and Science; (ii) The annual report from the CIO for submission to the Secretary, the Information Technology Advisory Council, and the Joint Commission on Technology and Science on a prioritized list of Recommended Technology Investment Projects (RTIP Report); (iii) The development by the CIO and regular update of a methodology for prioritizing projects based upon the allocation of points to defined criteria and the inclusion of this information in the RTIP Report; (iv) The indication by the CIO of the number of points and how they were awarded for each project recommended for funding in the RTIP Report; (vi) The reporting, for each project listed in the RTIP, of all projected costs of ongoing operations and maintenance activities of the project for the next three biennia following project implementation, a justification and description for each project baseline change, and whether the project fails to incorporate existing standards for the maintenance, exchange, and security of data; and (vii) The reporting of trends in current projected information technology spending by state agencies and secretariats, including

spending on projects, operations and maintenance, and payments to Virginia Information Technologies Agency.

2. Pursuant to § 2.2-1509.3, Code of Virginia, the following major information technology projects are active and have been approved and recommended for funding by the Secretary of Technology. The data listed was self-reported to the Virginia Information Technologies Agency by the responsible agencies. These projects are supported by strong business cases and thus were considered as priorities for funding in this biennium.

Agency Name / Project Title / Description	Start Date	Completion Date	Estimated Project Cost
<b>Department of Social Services (765) -- Automated Child Care Subsidy System</b>	Jan 11, 2010		\$20,364,802
		Completed	

Implement a Child Care Subsidy Payment System (CCSPS) for Child Care Subsidies. The CCSPS will allow for real-time documentation of attendance and enable the program to better address issues relating to improper use of subsidies.

Estimated Project Expenditures	FY 2013	FY 2014
General Fund	\$0	\$0
Nongeneral Fund	\$0	\$0

Agency Name / Project Title / Description	Start Date	Completion Date	Estimated Project Cost
<b>Department of Social Services (765) – EDSP – Eligibility Modernization – MAGI Project</b>	Oct 22, 2012	Oct 31, 2013	\$22,525,210

The Eligibility Modernization Modified Adjusted Gross Income (MAGI) project will implement a single Medicaid case management system for MAGI Medicaid and CHIP/FAMIS categories by modifying Virginia Case Management System (VaCMS) for new applications. This initiative will implement a streamlined, secure, and interactive customer experience that will maximize automation and real-time adjudication while protecting privacy and personally identifiable information. This enhancement to the Customer Portal will determine MAGI Medicaid eligibility on-line, perform MMIS enrollment, perform MMIS disenrollment, access Federal and State verification systems through Exchanges, and leverage web-services such as the Commonwealth Authentication Service (CAS) and the Enterprise Data Management (EDM) solution projects under eHHR.

Estimated Project Expenditures	FY 2013	FY 2014
General Fund	\$2,305,736	\$768,579

Nongeneral Fund	\$14,588,173	\$4,862,724
-----------------	--------------	-------------

Agency Name / Project Title / Description	Start Date	Completion Date	Estimated Project Cost
<b>Department of Social Services (765) – EDSP – Eligibility Modernization – Program Migration Project</b>	Oct 22, 2012	Mar 31, 2016	\$75,212,015

The modernization and migration consists of MAPPER UNISYS system replacement for the ADAPT application and the Energy Assistance Program application. ADAPT is the current eligibility determination and case management system for SNAP, TANF, Employment Service. The Eligibility Modernization Program Migration Project will convert the cases that contain the programs in ADAPT and the Energy system into VaCMS along with accepting new applications for these programs via online (Customer Portal) and paper (manual data entry) processes. This project also involves the external rules engine (iLOG). All program rules will be incorporated into iLOG with the outcome of eligibility determination, authorization, and case management within this single case management solution.

Estimated Project Expenditures	FY 2013	FY 2014
General Fund	\$2,924,187	\$5,848,374
Nongeneral Fund	\$8,646,892	\$17,293,784

Agency Name / Project Title / Description	Start Date	Completion Date	Estimated Project Cost
<b>Department of Social Services (765) – EDSP – Eligibility Modernization – Conversion</b>	Nov 13, 2012	Apr 30, 2015	\$10,583,249

The EDSP Eligibility Modernization Conversion project will focus its efforts on converting the data in the ADAPT legacy system and DMAS CHAMPS legacy system for the Families & Children's Medicaid, CHIP, and FAMIS categories into VaCMS. The CMS federal requirement stipulates for these eligible ongoing Medicaid categories (starting April 2014) at the time of their renewal process, continued eligibility must be evaluated against the new MAGI Medicaid rules. This conversion project will move those existing cases into VaCMS and eligibility determination be performed by the external rules engine accomplished in the Eligibility Modernization MAGI project. Conversion will be performed on a month by month schedule (based on the Medicaid renewal date) until all cases for these categories have been converted from these two legacy systems.

<b>Estimated Project Expenditures</b>	<b>FY 2013</b>	<b>FY 2014</b>
General Fund	\$297,654	\$892,962
Nongeneral Fund	\$2,348,158	\$7,044,475

<b>Agency Name / Project Title / Description</b>	<b>Start Date</b>	<b>Completion Date</b>	<b>Estimated Project Cost</b>
<b>Department of Accounts (151) -- Cardinal Project</b>	Apr 17, 2008		
		Completed	\$58,337,353

The Department of Accounts is replacing its statewide general ledger system- CARS. The new system will serve as the Commonwealth's general ledger system of record. The functional scope of the project includes General Ledger, Cash Receipting, and Cash Disbursement, which is considered the Enterprise Base System. This project consists of roll-out of the base application to replace the Virginia Department of Transportation's (VDOT) FMS II system, roll-out of the Enterprise Base System at the Department of Accounts Fiscal Office, and statewide roll-out to all agencies of the Enterprise Base System, replacing CARS as the Commonwealth's general ledger system. Estimated project cost includes VDOT costs.

<b>Estimated Project Expenditures</b>	<b>FY 2013</b>	<b>FY 2014</b>
General Fund	\$0	\$0
Nongeneral Fund	\$164,978	\$0

<b>Agency Name / Project Title / Description</b>	<b>Start Date</b>	<b>Completion Date</b>	<b>Estimated Project Cost</b>
<b>Department of Professional and Occupational Regulation (222) -- EAGLES</b>	Mar 1, 2007		
		Jan 31, 2014	\$7,977,793

EAGLES will be a web-enabled application implemented to replace two legacy systems, CLES and ETS. EAGLES will also support the agency's new business requirements. This project is in line with the Commonwealth's electronic government initiative, which requires that the Department be aligned closely with the Digital Signatures and COVA PIN initiative. Project Scope: This project scope includes the development of the EAGLES web-enabled application to replace the legacy systems, CLES and ETS, and the expansion of the system to include the Department's new business requirements.

<b>Estimated Project Expenditures</b>	<b>FY 2013</b>	<b>FY 2014</b>
General Fund	\$0	\$0
Nongeneral Fund	\$1,260,600	\$376,500

<b>Agency Name / Project Title / Description</b>	<b>Start Date</b>	<b>Completion Date</b>	<b>Estimated Project Cost</b>
<b>Department of Social Services (765) -- EDS - Customer Portal Enterprise Delivery System Program</b>	Feb 8, 2011	Sep 14, 2012	
			\$11,201,779

The Enterprise Delivery System Program represents four major projects: the EDSP Worker Portal, the EDSP Customer Portal, the EDSP Master Customer ID and the EDSP Document Management Imaging System. The four major projects are the foundation for implementing the VDSS vision of a self-service model that is efficient, effective and provides a streamlined customer friendly experience. Within the vision, clients will be able to file applications for benefits or services through an online application process, report changes, and manage benefit "accounts" online.

<b>Estimated Project Expenditures</b>	<b>FY 2013</b>	<b>FY 2014</b>
General Fund	\$31,499	\$0
Nongeneral Fund	\$65,501	\$0

<b>Agency Name / Project Title / Description</b>	<b>Start Date</b>	<b>Completion Date</b>	<b>Estimated Project Cost</b>
<b>Virginia Department of Transportation (501) -- Highway Performance Monitoring System (HPMS)</b>	Sep 1, 2009		
		Completed	\$1,316,375

The Highway Performance Monitoring System (HPMS) supports the Roadway Network Systems (RNS) program within the Department of Transportation (VDOT). The HPMS project includes adding new data fields to RNS for new data; adding classified public roads to the Highway Traffic Records Information System (HTRIS); building a user interface to add/edit data in RNS; and developing a means of managing and creating a file to send all required data to the Federal Highway Administration (FHWA).

<b>Estimated Project Expenditures</b>	<b>FY 2013</b>	<b>FY 2014</b>
General Fund	\$0	\$0
Nongeneral Fund		\$0
	\$35,000	

<b>Agency Name / Project Title / Description</b>	<b>Start Date</b>	<b>Completion Date</b>	<b>Estimated Project Cost</b>
<b>Virginia Department of Transportation (501) – CSC System 2.0</b>	Aug 6, 2012	Jun 30, 2014	\$4,500,000

The Customer Service Center Portal 2.0 project will enhance the functionality and usability of the Customer Service Center Portal, and will: Enable Customer Service Center Agents to better respond to customer inquiries; – Promote VDOT's ability to share information throughout the agency; and Enhance VDOT's ability to quickly and efficiently respond to citizen requests for roadway service/ maintenance.

<b>Virginia Department of Transportation (501) – Snow Plowing Tracking</b>	Oct 12, 2012	May 31, 2014	\$5,220,380

The scope of the Snow Plow Tracking Project is to provide a comprehensive approach for VDOT to manage its snow plowing tracking initiative across the entire Commonwealth. VDOT intends to provide snow plowing tracking and display for operational use and public consumption statewide on all VDOT managed roadways at the street level. The Department also wishes to improve customer services and transparency of services being provided across the Commonwealth and improve internal business operations across the enterprise.

<b>Department of Medical Assistance Services (602) -- HIPAA Upgraded Transactions (5010/NCPDPD.0)</b>	Apr 19, 2011		
		Completed	\$1,446,945

The Centers for Medicare and Medicaid Services (CMS) has proposed regulations requiring that all X12 Transactions be upgraded to the 5010 versions and that the ICD-10 version of the code sets be implemented. DMAS must implement the new versions in order to remain HIPAA compliant and continue to receive and send electronic eligibility, claims, and payment data with approximately 50,000 providers and 300 plus service centers. Implementation of the changes will require modification to the MMIS and extensive provider outreach and trading partner testing.

<b>Virginia State Police (156) -- Law Enforcement Activity Management System</b>	Jun 13, 2007		
		Feb 15, 2013	\$3,421,600

The LEAMS project will provide a comprehensive system to support the documentation of criminal investigations and related law enforcement activities and reduce the agency's dependence on burdensome paper-based workflows and difficult-to-change legacy technologies. The system will make use of up-to-date technology to upgrade process controls, management/supervisory oversight, data quality, processing timeliness, system access, analytical tools, and intra-agency and inter-agency cooperation needed to maintain quality law enforcement records as mandated under § 15.2.-1722 of the Code of Virginia.

<b>Virginia State Police (156) – AFIS Upgrade to Integra – Phase 1</b>	Jan 18, 2012	Nov 18, 2012	\$1,010,354

Upgrade the current AFIS system hardware and software with a new NEC Integra ID system. This new system will be installed at the VSP central site and will offer added flexibility in the automated workflow options and specifications. The proposed redundant hardware solution will offer improved Disaster Recovery possibilities. The proprietary hardware matchers will be replaced with off-the-shelf hardware and software matching. Phase 1: Phase 1 of the project will include the new functionality for Mobile ID identifications and responses and submission of the searches to the FBI Repository of Individuals of Special Concern (RISC). This will require the current database to be converted to the new Automated Biometric Identification System (ABIS) format. New hardware is needed to support the new functionality and the new database.

<b>Agency Name / Project Title / Description</b>	<b>Start Date</b>	<b>Completion Date</b>	<b>Estimated Project Cost</b>
<b>Department of Behavioral Health and Developmental Services (720) -- Medication Management System: Pharmacy Systems Software Application</b>	Oct 6, 2008		\$3,500,000

Completed

The Medication Management System will replace the legacy pharmacy system with an integrated medication management application sharing an electronic medical record repository. The scope of the project is to implement a medication management system that utilizes an electronic medical

record repository at each DBHDS facility. The project would replace legacy systems and integrate with recent IT investments such as AVATAR for patient/resident admissions, discharges, and reimbursements. The project would also replace the outdated In-Patient and Aftercare pharmacy systems.

<b>Agency Name / Project Title / Description</b>	<b>Start Date</b>	<b>Completion Date</b>	<b>Estimated Project Cost</b>
<b>Department of Planning and Budget (122) -- Performance Budgeting Solution</b>	Jul 24, 2009		
		Completed	\$15,000,312

The project is the implementation of a performance budgeting system to replace the current budgeting and strategic planning applications (PROBUD, WebBEARS, Budgetwise and Expendwise). Today the Commonwealth's strategic planning and budget development processes use a wide range of disparate systems. These systems have limited integration and interfacing capabilities. The Commonwealth currently relies on numerous systems, applications, and processes to support the Performance Budgeting business process.

<b>Department of Corrections (799) -- Phase 2 and 3 Virginia Correctional Information System (CORIS)</b>	Jun 22, 2006		
		Nov 30, 2012	\$23,093,458

The Department of Corrections (DOC) has established an automated Offender Management Information System (OMS) Program, now called VirginiaCORIS. This is a major technology effort and is critical to the successful accomplishment of the DOC mission. The VirginiaCORIS Program will be composed of multiple major projects, and will result in a single, fully integrated system that should replace most of the DOC's current offender-related application portfolio. The selected solution is already in production in other state DOCs, with some additional required functionality being developed and planned for deployment in the next 12 months.

<b>Agency Name / Project Title / Description</b>	<b>Start Date</b>	<b>Completion Date</b>	<b>Estimated Project Cost</b>
<b>Virginia Department of Transportation (501) -- Roadway Inventory Management System</b>	Jan 1, 2010		\$
		Aug 30, 2013	\$4,995,000

The Roadway Inventory Management System (RIMS) supports the Roadway Network Systems (RNS) program within the Department of Transportation (VDOT). RIMS involve a process redesign that will assist RNS in providing road inventory and attribute data on Straight Line Diagrams (SLDs) and maps. The current process and systems for capturing roadway inventory data are slow, inefficient and do not portray an accurate picture of the ground truth. No mapping capability is present today. Upon completion, RIMS will support RNS in providing streamlined business processes; timely updates to inventory; advanced inventory query and reporting; enhanced mapping functions; improved performance; and eliminate duplicate data entry for road inventory within the Database for Administering Changes in VDOT Highway Systems (DACHS) application.

<b>Virginia Employment Commission (182) -- Unemployment Insurance Modernization</b>	Sep 17, 2009		
		Sep 11, 2014	\$58,540,155

The VEC needs to modernize the Unemployment Insurance Benefits and Tax (UIBT) system. The current system is based on VEC priorities identified in the mid-1980s. Since that time, the statutory environment and the business processes have changed. The current UIBT system is difficult to upgrade and costly to maintain when compared to systems that are available in today's market. As a result of these concerns, VEC has identified two goals for the Unemployment Insurance Modernization Project: Replace the existing UIBT applications using a foundation of new technology and improved design methods to improve flexibility and maintainability.

Estimated Project Expenditures	FY 2013	FY 2014

<b>Virginia Department of Transportation (501) -- VGIN/VDOT Road Centerline Transition Project</b>	Jun 15, 2010		\$1,053,521

Completed

The Commonwealth of Virginia has established the goal that for each type of data there will be a single source system of record. In addition, the Commonwealth Chief Information Officer (CIO) has mandated that the Roadway Network System (RNS) migrate to and use the enterprise road centerlines (E-RCL) maintained by the Virginia Geographic Information Network (VGIN). This project supports achievement of both goals by addressing two main business problems: 1) the existence of multiple sources of road centerline (RCL) data, and 2) the duplication of effort required to maintain these multiple data sets.

		Aug 26, 2013	\$6,619,018

The Women, Infants, and Children (WIC) Electronic Benefits Transfer (EBT) Project will develop and implement the business processes and associated technology to provide electronic WIC (e-WIC) issuance, redemption, payment, and reconciliation services to distribute food benefits in the Virginia WIC Program. The manual, paper-based system introduces numerous inefficiencies into the process. The project will require procurement of a number of services including support for the development of an Implementation Advanced Planning Document (IAPD), as required by the United States Department of Agriculture Food and Nutrition Service, Quality Assurance and Monitoring, and Design, Development, and Implementation of the selected e-WIC solution. The project will implement an online, outsourced EBT technology.

<b>Virginia Information Technologies Agency (136) -- Commonwealth Service Oriented Architecture</b>	Sep 21, 2011		
		Nov 29, 2013	\$11,756,392

This program created the Commonwealth Service Oriented Architecture Project to provide the necessary infrastructure and governance. As such, the project shall procure, install, and configure the software and hardware necessary to establish test, production, and disaster recovery environments. In addition, the project shall institute an appropriate Center of Competence and related governance. Finally, in concert with the Commonwealth Enterprise Data Management (EDM) Project, this project shall develop and deploy the web services for the Commonwealth's EDM solution.

<b>Virginia Information Technologies Agency (136) – Telecommunications Expense (Management) and Billing Systems (TEBS)</b>	May 1, 2013	Mar 31, 2015	\$3,000,000

The Telecommunications Expense (Management) and Billing System (TEBS) project will procure and implement a modern, integrated, user-friendly telecommunications expense management and billing solution. The TEBS project is for the Virginia Information Technologies Agency (VITA). The goal of the TEBS project is to replace the 30+ year-old mainframe Telecommunications Inventory Billing System (TIBS) that currently supports VITA's Telecommunications Service Delivery with a modern integrated, user-friendly system that supports all of the existing TIBS functionality and providing additional telecommunication expense functionality.

<b>Department of Health (601) -- Electronic Death Registration (EDR)</b>	Mar 22, 2011	Dec 30, 2014	\$3,003,500

The Electronic Death Registration (EDR) system is a proposed web-based system that would allow for the electronic capture of death data from funeral service licensees, state medical examiners and state physicians. The system would allow the VDH Division of Vital Records (DVR) and local health departments to issue and retain death certificates electronically as opposed to the manual process that is currently used. The Electronic Death Registration system is expected to reduce reporting delays, improve data quality, and increase the utility of death data.

<b>Department of Motor Vehicles (154) -- DMV CSI Systems Redesign - Development and Implementation</b>	Nov 15, 2010		\$69,954,521

Cancelled

The CSS Redesign focuses on the fragmented processing of DMV's three major business areas: driver, vehicle, and motor carrier. The purpose of the redesign is to transform these fragmented fifteen year old systems into one modernized system that is responsive to the ever-changing needs relating to internal security, homeland security, legislative mandates, and customer relationship management. DMV has a unique opportunity to revolutionize the agency's approach to fulfilling its mission, carrying out core functions, and delivering service. DMV intends to fully integrate processing while incorporating and leveraging the full functionality and benefits of proposed technology solutions as well as the technology already in place.

<b>Secretary of Health and Human Resources (188) – HIT/MITA Program</b>	Nov 14, 2011	Apr 29, 2014	\$53,373,320

The purpose of the HIT/MITA Program is to align the Commonwealth with Federal direction relative to the American Recovery and Reinvestment Act (ARRA) and the Patient Protection and Affordable Care Act of 2010 (PPACA). These acts present significant funding opportunities to improve the quality and value of American healthcare. PPACA mandates Medicaid expansion in 2014, which is predicted to increase Virginia's Medicaid membership by 35-45%. Leveraging the Federal funding opportunities to offset the impact of expansion is an important investment in Virginia's future. The Federal funding available under ARRA and PPACA provide opportunities to achieve the following outcomes for Virginia; Build on current health reform efforts; Modernize information technology infrastructure as an enabler for future business transformation; Provide a technical environment where standards-based interoperability is possible between new and legacy systems; Provide web based self-directed service options for human services; Reduce the need for large administrative and operational staff for Federal and State programs; Reduce overall long-term technology costs for Federal and State programs; and Provide an enterprise technology environment that is accessible on a pay-for-use basis by Federal, State, and local governments as well as non-government organizations, community based-services, and commercial interests as allowed by policy.

<b>Jamestown-Yorktown Foundation (425) -- Yorktown Museum Replacement Technology</b>	Dec 30, 2011		
		Dec 31, 2016	\$2,395,000

This project will install the requisite technology components for the Yorktown Museum replacement project, including exhibit technology, audio visual components, wireless, data and telecommunications. The Yorktown Museum Replacement project will improve the necessary IT infrastructure in order to accommodate expected future visitation.

<b>Estimated Project Expenditures</b>	<b>FY 2013</b>	<b>FY 2014</b>
General Fund	\$0	\$0
Nongeneral Fund		
	\$146,000	\$747,000

2. The Health Care Reform program office has been established by the Secretary of Health and Human Resources to address the American Recovery and Reinvestment Act (ARRA), the Patient Protection and Patient Affordability Act (PPACA), and the Medicaid Information Technology Architecture (MITA). This program will be generating approximately 23 major as well as non-major projects and the total cost of the program over seven years is expected to be \$93,043,146 with a cost to the Commonwealth of \$9,773,220. Projects will be established over the

next four years. The seven year costs include six years of operational expenses associated with the provider incentive program that sunsets in 2021. New recurring Medicaid expenses are also reflected in the seven year cost estimates. The projects and cost estimates in this paragraph include efforts to modernize eligibility determination systems within the Department of Social Services.
