Rebasing and inflation estimates that are required by existing law or regulation for any Medicaid provider shall be included in the forecast. The forecast shall also include an estimate of projected increases or decreases in managed care costs, including estimates regarding changes in managed care rates for the three-year period. In preparing for each year's forecast of the managed care portions of the budget, the department shall submit to its actuarial contractor a letter, with a copy sent to the Department of Planning and Budget and the Chairmen of the House Appropriations and Senate Finance Committees. This letter shall document the department's request for a point estimate of the rate of increase in rates, based on application of actuarial principals and methodologies and information available at the time of the forecast, that the contractor estimates will occur in the years being forecast, and shall specify the population groupings for which estimates are requested. The department shall request that the contractor reply in writing with a copy to all parties copied on the department's letter.

3.
