Higher Education

House Bill 1700

REPORT OF THE SUBCOMMITTEE on HIGHER EDUCATION

Mr. Chairman and Members of the Committee:

Mr. Chairman, the Subcommittee's recommendations today continue the progress we made last session to reflect this Committee's consistent goals of increasing access for Virginia students, holding down costs for Virginia families, enhancing the quality of their education and improving their job opportunities.

You will recall Mr. Chairman, last session we started a new approach of funding degree production in four key areas — Data Science & Technology, Science & Engineering, Healthcare & Education. Our goal was to better align our public institutions with the Commonwealth's strategic goals and business and industry. Here we are a year later and that approach is a key component of how we plan to address the tech talent pipeline and create the needed degrees for Amazon and beyond. To that end, Mr. Chairman, the Subcommittee recommends \$27.9 million to increase the number of computer science and related degrees contemplated in HB 2490.

Mr. Chairman, this Subcommittee has attempted over the years to address the issue of college affordability. This year we are able to build on the significant investment from last session, and we believe, make a dent in the cost of attending our public colleges and universities. There Mr. Chairman, the Subcommittee recommends \$45.7 million to allow colleges to keep tuition at the FY 2019 levels. When you combine these funds with the funding for salaries, degree production, general operating support and financial aid, which total over \$157 million in FY 20, we would submit there is no reason that our colleges should not

be able to provide Virginia families with a break from another year of tuition increases. Mr. Chairman, I would point out this is not mandatory. Essentially the institution's Board of Visitors can choose to decline the new general fund and continue on their well-worn path. If that is their choice, we ask that their Rector provide a copy of the Board Resolution to the Chairman explaining that choice.

Mr. Chairman, the Subcommittee also recommends additional funding of \$4 million for workforce credential grants and \$5.2 million for tuition assistance grants, providing Virginians with affordable alternative pathways toward a postsecondary education.

Mr. Chairman, our recommendations also include \$3.5 million to support Eastern Virginia Medical School accreditation requirements and community health programs in partnership with Sentara. Also, Mr. Chairman, the Subcommittee enthusiastically recommends \$8 million for the creation of the Hampton Roads Biomedical Research Consortium, a partnership with the University of Virginia, Old Dominion University, Eastern Virginia Medical School and private or non-profit hospitals. This has the potential to provide significant economic growth opportunities in the Hampton Roads region.

Finally, Mr. Chairman, the Subcommittee would like to thank you and Mr. Poindexter for your leadership and support in providing what is now a 3% faculty salary increase beginning July 2019. Higher education remains a labor intensive enterprise and these funds along with our other recommendations will provide our institutions with the ability to meet the needs of our students and keep tuition affordable for Virginia families.

Mr. Chairman, details of our Subcommittee recommendations are attached. Committee staff will review our report and the attached listing of our recommendations in greater detail and I hope that it will be the pleasure of the Committee to adopt them.

Respectfully Submitted by the House Appropriations Subcommittee on Higher Education:

L. Nick Rush, Chair	R. Steven Landes
Charles D. Poindexter	Christopher P. Stolle
Roxann L. Robinson	Luke E. Torian
Betsy B. Carr	C.E. Hayes, Vr.
